

# Madura Guano Gold Kwik Start

## 100% Natural Organic Phosphatic Fertilizer & Soil Conditioner

Guano Gold is a valuable resource which reforms the structure and function of soil, as well as being one of the world's most valuable phosphorus fertilizers. There is no chance of salinization and damage to plant growth by Guano Gold, so it is a very safe product to use.

Guano Gold is composed of dicalcium-phosphate layers which have been generated by interaction of the remains of coral, sea birds, fish and seaweed, as the land gradually rose over many thousands of years.

Guano Gold contains coral-calcium, which is a chief component of coral reefs and phosphoric and silicic acids which come from the droppings of sea birds and the remains of fish and seaweed, together with various minerals which are shown in our comprehensive analysis.

## Guano Gold Kwik Start

### Product Analysis

Phosphorus.....	11.6%
Calcium.....	29.0%
Silica.....	10.0%
Organic Carbon .....	8.6%
C.E.C.....	129Me./100Grams

# Technical & Service

## Guano Gold-Kwik Start

The combination of the available **Citrate Soluble**/fast and slow release of Phosphorus, is a unique Guano Gold feature. This, combined with Calcium, Silica, High CEC, Organic Carbon and many other trace elements in Guano Gold-Kwik Start, is now recognised and as such, farmers and growers are enjoying excellent results.

Guano Gold-Kwik Start has been successfully applied and given excellent results on **acid, neutral and alkaline soils** across Australia. In order to achieve these results, it is extremely important for farmers and growers to embrace the real importance of working towards creating a balance in their soils and adding the correct cost effective nutrient inputs.

Guano Australia Pty. Ltd. is very active in supporting customers with independent soil testing, backed up by specially trained Agronomists, Horticulturists and Viticulturists providing a full range of technical advisory services.

## Custom Blending

Guano Gold-Kwik Start is evenly granulated. Being dust free Guano Gold-Kwik Start is compatible with all types of fertilizers, both Organic and Conventional.

In order to meet customer demand, Guano Gold-Kwik Start is successfully included as an important component in a full range of Organic, Bio-Dynamic and conventional custom blends.

With ever changing markets, customer needs for chemical free/low chemical inputs, Guano Gold-Kwik Start is now meeting these huge market niches.
